

□ Blood Pressure Log

Patient: Divya Mehrotra

Age: 33 years

EDD: September 4, 2026

Current Week: 17+3 (2nd Trimester)

Report Date: March 30, 2026

Primary OB-GYN: Dr. Madhulika

□ BP Readings (March 2026)

Date	Time	Systolic	Diastolic	Pulse	Week	Notes
Mar 27, 2026	5:00 PM	121	71	100	17	Evening. Had backache + fatigue
Mar 25, 2026	Morning	116	77	105	17	Morning reading
Mar 24, 2026	Morning	117	81	114	17	Morning reading
Mar 23, 2026	Morning	120	81	111	16+3	Fasting, ~45 min after waking
Mar 22, 2026	Afternoon	128	84	—	16+2	30-45 min post-lunch

□ Summary

118

Avg Systolic (mmHg)

79

Avg Diastolic (mmHg)

108

Avg Pulse (bpm)

□ Assessment

Blood Pressure: All readings within normal range for pregnancy. One slightly elevated systolic (128) on Mar 22, but post-lunch timing explains this.

Diastolic Trend: Improving (84 → 81 → 77 → 71) — very healthy pattern.

Pulse: 100-114 bpm — within normal pregnancy range (baseline increases 10-20 bpm during 2nd trimester).

▢ Reference Ranges (Pregnancy)

Category	Systolic (mmHg)	Diastolic (mmHg)
Normal	<120	<80
Elevated	120-129	<80
Stage 1 Hypertension	130-139	80-89
Stage 2 Hypertension	≥140	≥90
