

Previously on STAGE...

Here's what happens before we show up and why our mission matters now.

Churned

They Left 🖐️ — Nobody Was Doing Anything

Re-acquisition

You Are Here — We Step In

Once a user churns, no other pod touches them. They're abandoned. That's where we come in. **4.26 million people paid Stage, watched content, and left.**

We are going to bring them back.

The Enemy

Who we are dealing with — and why they're worth fighting for

4.26M

They Paid

Paid money. Not cold leads.
They've already opened their
wallets.

₹

They Watched

Content affinity is proven. They
found value in our shows.

They Can Return

Recall exists. This is our advantage.

Paid. Watched. Left. This is the battleground.

Not All 4.26M Are Worth the Same Fight

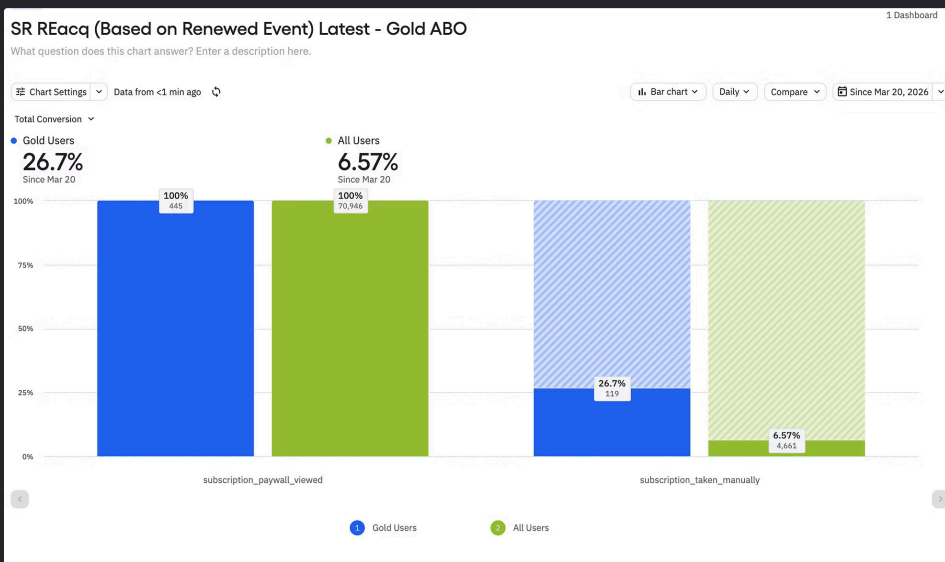

We conducted a 5-layer churn analysis to identify our Gold Tier — the users most likely to return

1.9M Users

44.6% of churned base

Qualification Criteria

- Medium or high engagement (4+ completions)
- Multi-cycle subscribers with any watch activity
- Segments by tenure, content behavior & payment intent

2.86x

Higher Subscription Rate

Gold Tier vs. all churned users

Gold Tier is the right battleground. We're focusing our resources where they matter most.

Operation Hunt

Paid performance marketing to bring them back

01

Content Re-targeting

Identified what each user watched. Re-targeted with sequels & related content. Example: Watched Punarjanam? We showed them Maha Punarjanam.

02

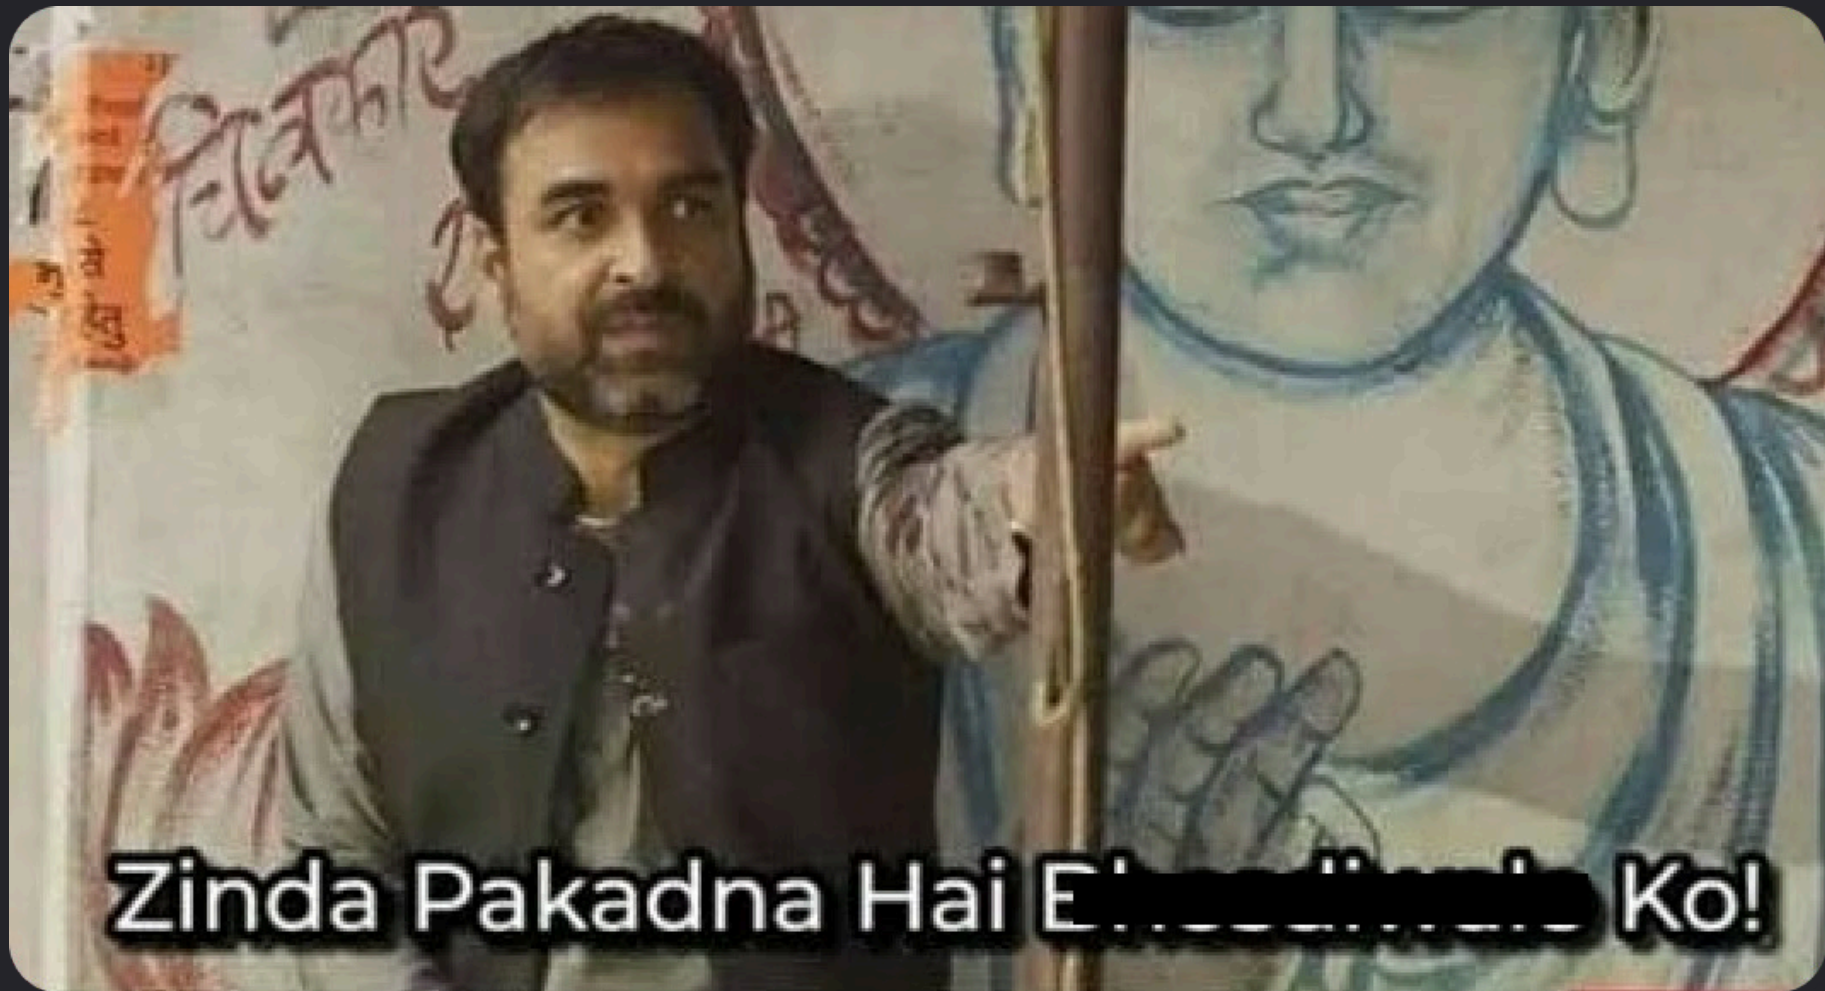

Scaled on Right Channels

Deployed Meta App Campaigns, Meta Web Campaigns, and Google App Campaigns. Continuously A/B tested creatives and optimized by content performance.

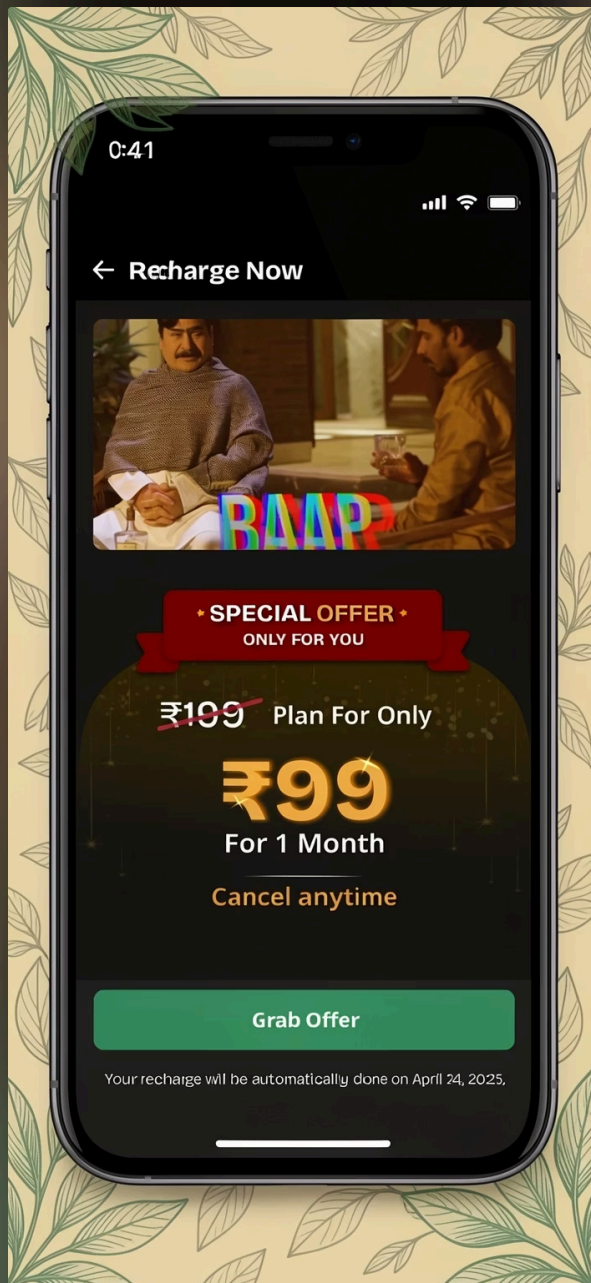

03

The Result

Gold cohort SR: 30% vs. general cohort: 10%. High-relevance creative = high CTR. **3x higher subscription rate from same ad spend.**

Zinda Pakadna Hai E..... Ko!

Operation Convert

Optimizing the product to maximize subscription rate

₹99 Plan

New Price Point

Introduced ₹99/month plan specially for re-acquisition users.

Special Access

Unlocked Experience

Users land on unlocked experience. **+30% CVR** vs. non-special access users.

Paywall Video

Content Breadth

Shows content breadth in 30 seconds. **+7% SR improvement.**

CLM Rescue

Dropped Users

Dropped after seeing plan? ₹51 offer via WhatsApp/SMS. Automated recovery flow.

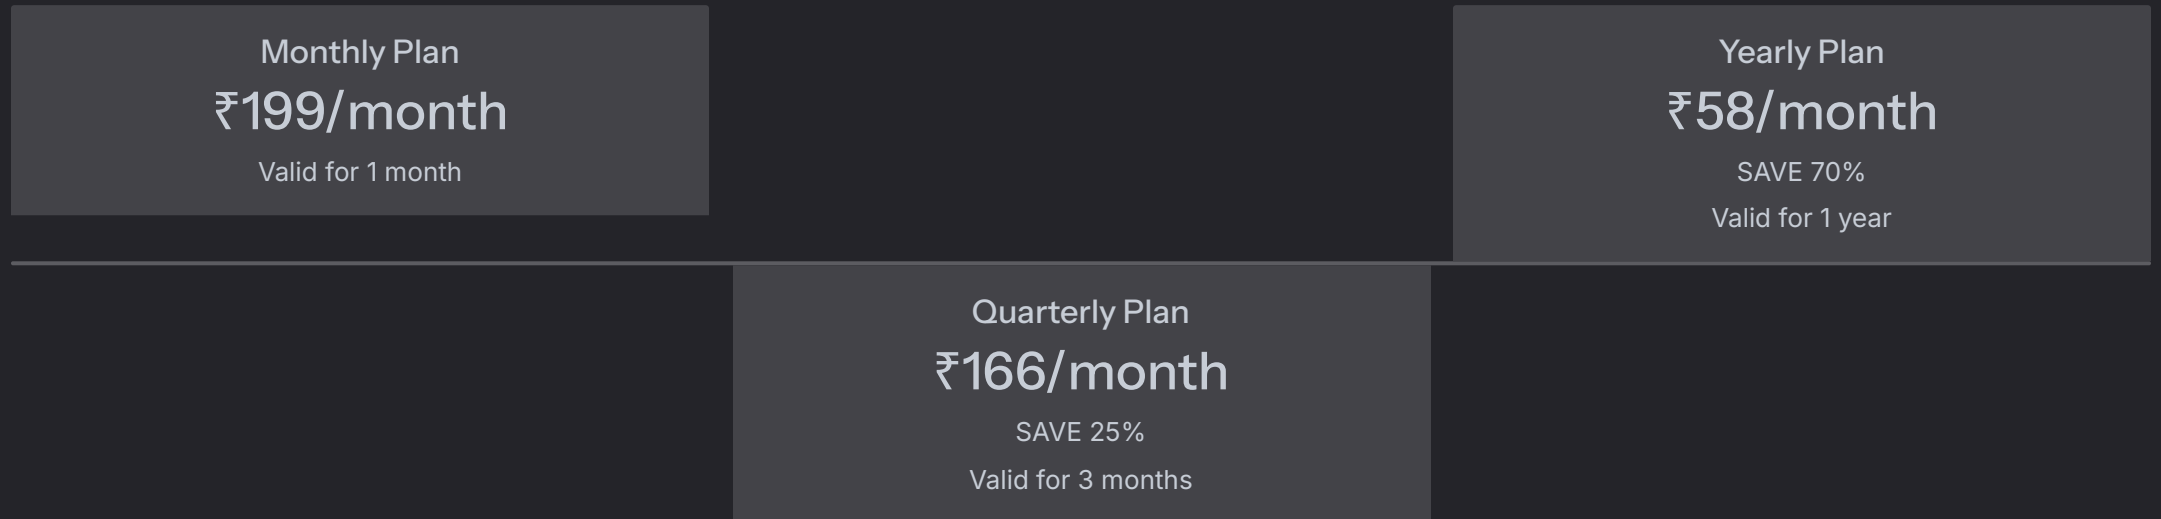

Considration 1_9x16 (1) (1) (1) (1).mp4

Operation Decoy

The psychology of pricing — make the right choice obvious

We showed three plans. The result? **They always pick the smart one.**

The quarterly plan is the decoy. It makes ₹58/month feel like a no-brainer. Users compare quarterly to monthly, then see yearly as the obvious winner.

2x

Revenue Per User
vs. standard single-plan paywall

📌 First cycle data — LTV tracking ongoing.

The Mission Continues

Where we're going from here

1,500 Subscriptions/Day

From re-acquired churned users within a month

Positive CAC:LTV

Across entire 4.26M base

Scale Gold Tier Wins

To remaining cohorts

Keep Iterating

On product flow + CLM

The plane is built. Now we scale it.
